

**PRODUCT DATA SHEET****ESM-650 12/11/2009****Product Name:** Electrical Safety Matting – 650 Volt Working**Product Reference:** ESM-650**General description**

Natural rubber based electrical matting produced in rolls, 9.5mm nominal thickness with continuous 2mm high ribbed pattern and providing safe working with 650 volt equipment. Working voltage continuously marked on reverse side.

**Material Properties:**

Tensile strength: 5MPa, min BS 903 [measured after ageing for 10 days at 70° in air oven]

Elongation at break 250% min BS 903 [before &amp; after ageing]

Compression set 10% max BS 903 [assessed using constant load methods described in BS 921]

**Product Properties:**

Electrical breakdown strength: 15kv, min tested to BS:921

Leakage current: 160mA/m<sup>2</sup> tested to BS:921

Thickness: 8.5mm, min

Weight: 16kg/m<sup>2</sup>, approx
